HELPING REALTORS SELL MORE™

Introducing Listing Rover™

Listing Rover has all the marketing essentials built right in so you receive unmatched value with automatic updates to your listings, regular search engine submissions, automated link submissions to Realtor.ca, a free niche site, and private member reciprocity.

Automated listings.

Update your web site using Interface or Interface Express quickly, easily and without additional expense.

Automatic link submissions.

Every new listing is submitted to Realtor.ca for multimedia and map links automatically.

Open and flexible.

Work with any web designer you choose. Keep your existing site or build a new one. A real FTP account and an automatic \$1000 credit limit give you the freedom to choose.

Private member reciprocity.

Opt into PMR and leverage the power of Listing Rover as your listings are selectively shown on other member web sites--automatically, of course.

A free niche site.

Double your exposure and market to your special niche with a web site that shows your listings automatically.

Search engine submissions.

Your web site is submitted to 500,000 search engines every week so you'll rank high on Google and the other major search engines.
